

Custom Sanitary Manifolds

We offer both concentric and eccentric sanitary manifolds using our unique “pullout” technology. This manufacturing process is far superior to the traditional “fish mouth” method. It ensures full penetration welds, proper polishing and eliminates potential thin spots in the welds that can lead to cracks and corrosion.

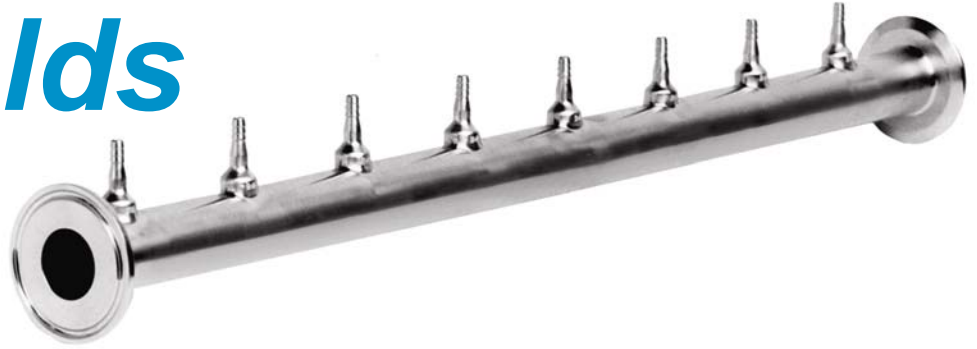

Our eccentric manifolds allow for complete drainage when the manifold is in either the vertical or horizontal position.

Features

- Sizes 1/2” - 6”
- Lengths up to 20 feet
- Wide variety of end connectors
- All cold worked areas are annealed to eliminate stress cracking
- All materials are marked with heat numbers. MTR’s are available upon request.
